

# H. TITLE INFORMATION

# HYPER CARS

# 1.000 HP & MORE...

by Roland Löwisch

## CONTENT:

It's a magical sound barrier: 1,000 hp! Mastering such power and skilfully moving it on the road and on the racetrack is the dream of many boys - and men! But it is also the dream of many engineers to coax such power from the engine.

This new title provides a comprehensive market overview on the so-called hypercars, which stand out in terms of design, performance, price and technology. Starting with the first hyper cars ever, which have been offered since the 1990s, and going on decade-wise until 2019, it describes all models with technical specifications (whether powered by combustion engines or electric motors - or both), their meaning in motorsports, and special equipment features.

The last chapter presents models launched in the last few years, up to the latest ones from 2024, such as Aston Martin Valhalla, Bugatti Mistral or Pininfarina B95 Gotham. Enjoy even an outlook on new models to be launched in 2025/26!

While most of us will hardly have a chance to drive one of these once in a lifetime, with this book everyone can indulge into amazing pictures!

Rights all available

## SPECIFICATIONS:

- 208 pages
- many coloured photographs
- hardcover
- trim size 215 x 270 mm
- retail price: € 20,-
- ISBN 978-3-96664-918-6
- Published December 2024
